

Nabhangan Engineers

Customized Workflow Management Software

End-to-end valuation case management · From lead to dispatch

Built exclusively for civil engineering & valuation firms

Multi-user · Role-based · Cloud-hosted · Mobile-ready

What is It?

A purpose-built platform for managing valuation projects from enquiry to dispatch

■ Case Management

Track every project from lead through survey, drafting, checking, print, scan and final dispatch — in one place.

■ Team Coordination

Assign stages to specific staff, monitor workloads, control who can work on what and when.

■ Reporting & Audit

Real-time stage dashboards, per-staff reports, CSV exports, and full project timelines for admin review.

8-Stage Workflow Pipeline

Every case follows a controlled sequence — no stage can be skipped

Lead	Survey	Rate Verific.	Drafting	Checking	Print	Scan	Dispatch
Case registered — owner, bank, property details captured. Awaits admin approval to proceed.	Site visit report filled: GPS, property dimensions, valuation, photos uploaded. Third-party surveyor link supported.	Market rate cross-check and preliminary valuation review by assigned staff.	Full valuation report drafted and formatted by the draughtsman.	Report reviewed for accuracy and compliance before final output.	Hard copies generated and logged.	Signed, stamped report scanned and archived digitally.	Final report dispatched to bank / client. Case marked complete.

■ **Flow Control:** Staff assigned to later stages cannot work until all preceding stages are submitted & locked by the admin.

Role-Based Access & Staff Features

Three roles, clearly separated responsibilities

Admin

- ✓ Full visibility across all cases and staff
- ✓ Create, edit, approve and delete cases
- ✓ Assign stages to staff members
- ✓ Revoke submitted stages for corrections
- ✓ Generate third-party surveyor links
- ✓ Download CSV reports (per project + all)
- ✓ View staff occupancy & workload dashboard
- ✓ Change staff login email / credentials

Staff

- ✓ View own assigned cases only
- ✓ Fill site visit reports with GPS capture
- ✓ Upload photos & documents (up to 10/case)
- ✓ Log time spent per stage
- ✓ Submit checklists to advance the workflow
- ✓ Request task reassignment from admin
- ✓ View personalised dashboard with greeting
- ✓ Download files uploaded to their stages

Third Party

- ✓ Access via one-time, time-limited secure link
- ✓ No login / account required
- ✓ Full site visit report form access
- ✓ GPS capture and photo upload
- ✓ Save draft and submit when ready
- ✓ Link auto-expires after set duration
- ✓ Link invalidated after first submission
- ✓ Tracked by name in assignments & dashboard

Reporting & Business Intelligence

Know your team's performance and every project's status at a glance

Admin Dashboard

- Live stage-wise case count tiles (8 stages)
- Active vs. closed case summary
- Stage distribution bar chart with drill-down
- Staff occupancy with load indicators (Free / Light / Moderate / Heavy)
- Third-party surveyor active link tracking

Staff Reports

- Weekly view: checklists submitted, hours logged
- Navigate week-by-week with prev / next controls
- All allotted tasks with Completed / Pending status
- Select any staff member and view their report

Project Timeline

- Per-project: stage × assigned staff × hours × submission date
- File count per stage
- Total hours aggregated across all stages
- Download as CSV (Excel-compatible, UTF-8)

All-Projects CSV Export

- One row per project, all stages in columns
- Staff name, hours, and submission date per stage
- Created by, address, current status included
- Instant download from admin Reports page

Security, Files & Platform

Enterprise-grade security with a cloud-first, mobile-ready architecture

■ Security & Access Control

Role-based access

Admin, Staff, Third Party — each sees only what they need

Stage-locked submissions

Once a stage is submitted it is read-only; admin revokes to re-open

Flow-gated workflow

Staff for later stages cannot edit until earlier stages are completed

One-time third-party links

Time-limited, single-use URLs with automatic expiry

Supabase Auth

Industry-standard authentication with secure session management

■ File Management

Signed URLs (1-year validity)

Files are never publicly accessible — every download is authenticated

Up to 10 photos per case

Up to 5 MB per photo, uploaded directly from mobile or desktop

Stage-organised storage

Files grouped by project and stage for easy retrieval

Admin delete on closed cases

Admin can bulk-delete files once a case is dispatched

Third-party photo upload

External surveyors can upload site photos via their secure link

■ Platform & Technology

Next.js 16 App Router

Fast, server-rendered pages with zero client-side flicker

Supabase (PostgreSQL)

Reliable, scalable cloud database with real-time capabilities

Hosted on Vercel / cloud

Globally distributed CDN, 99.9% uptime

Mobile-responsive UI

Works on phones, tablets, and desktops equally well

CSV Excel exports

All reports export with UTF-8 BOM for correct Indian character display
